IMVIP '99

Irish Machine Vision and Image Processing Conference 1999

8th - 9th September 1999

School of Electronic Engineering
Dublin City University, Dublin 9, Ireland

ISBN: 1 872 327 22 2

British Library Cataloguing in Publication Data. A catalogue for this book is available from the British Library.

No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means without the prior permission of the editor. However, permission is not required to copy papers for the purposes of research or private study on condition that a full reference to the source is given.
Foreword

The 1999 *Irish Machine Vision and Image Processing (IMVIP)* conference brings together theoreticians and practitioners, industrialists and academics from the numerous related disciplines involved in the processing and analysis of image-based information. This is the third conference in the series and is hosted by the School of Electronic Engineering, Dublin City University (DCU). Previous IMVIP conferences have been held in Magee College, University of Ulster and NUI, Maynooth.

The initial call for papers was issued in October of 1998, in which contributions were sought in all aspects of image processing, pattern analysis and machine vision. Since then we have received thirty-one papers from twenty different universities and research intuitions representing twelve countries. Each paper was subject to a double-blind review process by selected members of the programme committee. Twenty-five papers were accepted for oral presentation and for publication in the proceedings.

I wish to thank all the paper reviewers, without who’s cooperation it would be impossible to organize a conference of this type. I am extremely grateful to the members of the local organizing committee, especially Noel Murphy and Derek Molloy, the University support staff and my colleagues in the School of Electronic Engineering.

I would also like to thank our guest speakers: Prof. Matti Pietikäinen, *Machine Vision and Media Processing Group, University of Oulu* and Don Braggins, *Machine Vision Systems Consultancy* for agreeing to take part.

IMVIP '99 was run in association with the *Irish Pattern Recognition and Classification Society (IPRCS)*, a member organisation of the *International Association for Pattern Recognition (IAPR)*. (See [http://www.info.ulst.ac.uk/~jgc/iprsc/](http://www.info.ulst.ac.uk/~jgc/iprsc/) for further details).

September 1999
Acknowledgements

We would like to express our gratitude to our main sponsor Hewlett-Packard (Ireland). Additional support was provided by the Institution of Electrical Engineers (Irish Centre), Technology Systems International (Dublin) and Teltec (Ireland). This conference has been endorsed by the Machine Vision Association of the Society of Manufacturing Engineers.
Conference Chair

PF Whelan

Dublin City University

Programme Committee

A Bouridane
The Queens University of Belfast
JG Campbell
University of Ulster
T Carew
Technology Systems International
D Crookes
The Queens University of Belfast
C Heneghan
University College Dublin
J Kennedy
CAPTEC Ltd
A Kokaram
Trinity College Dublin
G Lacey
Trinity College Dublin
J Mahon
MV Technology Ltd
J Malone
St. James Hospital, Dublin
S Marlow
Dublin City University
N McMillan
The Institute of Technology Carlow
P Morrow
University of Ulster
N Murphy
Dublin City University
F Murtagh
The Queens University of Belfast
M Redfern
NUI, Galway
R Reilly
University College Dublin
A Shearer
NUI, Galway
A Smeaton
Dublin City University
A Sutherland
Dublin City University
D Vernon
NUI, Maynooth
BG Batchelor
University of Wales
D Braggins
Machine Vision Systems Consultancy
J Crowley
INPG, France
R Fisher
The University of Edinburgh
D Hogg
University of Leeds
P McKeveit
Aalborg University, Denmark & University of Sheffield, England
M Pietikäinen
University of Oulu, Finland
P Soille
Silsoe Research Institute, England

Local Organising Committee

D Molloy
Dublin City University
O Ghita
Dublin City University
A Drimbarean
Dublin City University
Contents

Invited Papers

Texture and colour analysis for machine vision.
M Pietikäinen ................................................................. 3
The European vision industry - strength in diversity?
D Braggins ................................................................. 4

Video Processing / Segmentation

Automated Wavelet-based image addition: Application to surveillance video.
T Daubos, Z Geradts, J-L Starck, J Campbell and F Murtagh ............. 15
A video object generation tool for content creation in off-line MPEG-4 applications.
NE O’Connor, T Walsh and S Marlow .................................... 26
Applications of level set methods for image and video processing.
PD Harper and RB Reilly ................................................... 37
An evaluation of alternative techniques for automatic detection of shot boundaries in digital video.
AF Smeaton, J Gilvarry, G Gormley, B Tobin, S Marlow and N Murphy .. 45

Medical Imaging

Scatter and noise reduction in computed radiography images.
T O’Doherty, A Shearer, P Abbott and W van der Putten ...................... 63
A 3D reconstruction of a human organ using 2D ultrasound images.
G-M Muntean, C Rotaru, S Holban and C Hava ............................ 77

Active Vision / Tracking

Computation of time-to-collision from disparity and binocular difference optical flow.
S Xu ...................................................................................... 93
Identification of the optic disk boundary in retinal images using active contours.
F Mendels, C Heneghan and J-P Thiran .................................... 103
Active-mesh self-initialisation.
D Molloy and PF Whelan ..................................................... 116
Performance predication analysis for linear visual trackers.
P Tissainayagam and D Suter ................................................ 131
3D Imaging / Robot Navigation

Mobile robot navigation using omni-directional vision.
N Winters and J Santos-Victor .............................................151
Real time 3-D estimation using depth from defocus.
O Ghita and PF Whelan ...................................................... 167
3D Face measurement system with Cubescope.
Y Sato, K Hasegawa and K Hattori ..................................... 182

Image Processing / Recognition

Fourier descriptors as a general classification tool for topographic shapes.
L Keyes and A Winstanley ................................................... 193
Systematic and efficient construction of neighbourhood operators on irregular and adaptive grids.
B Scotney and M Herron ..................................................... 204
Fuzzy recognition of Chinese characters.
S Singh and A Amin ............................................................ 219
Information fusion of model and observed data for missing data imputation in oceanography.
G Zheng, J Campbell and F Murtagh ..................................... 228

Image Compression / Coding

Approximation of intensity images with adaptive triangular meshes: Towards a processable compressed representation.
MA Garcia, BX Vintimilla and AD Sappa ..................................241
Fractal and JPEG coding of still images - a combination.
JT McCarthy and N Murphy ................................................. 250

Applications, Architectures and Systems Integration

Online registration of watermarks from continuous web paper.
A Drimbarean, P Soille and PF Whelan .................................... 267
Design and FPGA implementation of a novel general purpose median filter.
K Benkrid and D Crookes .................................................... 280
Vision system for automatic weed detection.
F Feyvaerts, P Pollet, L. Van Gool and P Wambacq .....................288
Remotely operated prototyping environment for automated visual inspection.
BG Batchelor, MW Daley, RJ Hitchell, GJ Hunter, GE Jones and G Karantalis ................................................. 300
The application of vision to acquiring parking information.

N Dorr and C Guinois ................................................................. 321

A Hough transform inspired technique for the rapid fingerprinting and conceptual archiving of multianalyser tensiotraces.

ND McMillan, S Riedel, J McDonald, M O’Neill, N Whyte, A Augusti and J Mason ................................................................. 330
Invited Papers
Video Processing / Segmentation
Medical Imaging
Active Vision / Tracking
3D Imaging / Robot Navigation
Image Processing / Recognition
Image Compression / Coding
Applications, Architectures and Systems Integration
